Experience

○ 2022 - 2023

Comment application project

As of September 2022, it is a mobile application written with the flutter library. This mobile application can perform basic operations such as adding, removing, deleting and updating a website's mySQL database via API. This project was made without Firebase. The general purpose of the project is for people to earn money by commenting and spending time.

○ 2022-2023

E-commerce page table

In March 2022, an e-commerce page belonging to the union of exporters was created. This page was created for bistro and fabric sales. Since the page will be opened to different countries, extra language supports were offered.

○ 2021-2022

E-commerce page Electronic

In December 2021, an e-commerce page was created where only electronic gadgets could be sold.

○ 2020-2022

Comment website project

Website where users can be found in 3 different levels and earn money by writing comments. In this project, users can earn money by spending time and also earn money when their comments are viewed.

○ 2020-2022

International Unmanned Aerial Vehicles Competition

Between 2020-2022, color detections and object detections were made with an aerial unmanned aerial vehicle using rsapery pi mini computer and opencv library
